Mr. Marcel Acosta

Executive Director

401 9th Street, NW

Washington, DC 20576

Dear Mr. Acosta:

The purpose of this letter is to request a final review of the plans for installation of electric generating equipment to provide power redundancy and reliability at selected sites within Joint Base Myer-Henderson Hall (JBM-HH), Arlington, VA, and Fort McNair, Washington D.C.

The project, funded in FY 13, has been awarded to Dominion Virginia Power for 3 sites: 1 at Fort Myer near Building 431, and 2 sites at Fort McNair near buildings 52 and 36. The project was funded for a total amount of \$4,585,342. All planned equipment is to be mounted on concrete pads in the proximity of the existing outdoor switchgear.

Generator screen walls noted in the drawings are part of this generator installation contract and are shown in the attached sketches. The approximate project completion date for this portion of the work is March 30, 2014. No additional generator projects are anticipated at this time.

This submittal represents a **final design** for the generator upgrade work. **JBM-HH is requesting final review action by the Commission.** Should you have any questions, please contact Ms. Suzanne Hren at (703) 696-6369.

Sincerely,

Myrtle Bowen
Chief, Master Planning Division
Directorate of Public Works
